

Internship Program – AkashTechnolabs

Name: KamiyabHusen Bhatt

College: L.D. College of Engineering

Sem: 7th (BE-IT)

Date: 2nd June 2021

Day-7-Report **(Work Summary)**

INTERNSHIP at AkashTechnoLabs

Day-7: What we learnt?

- ✓ Today's session is completely Django practical based.
- ✓ First, we create new project using `django-admin startproject` command.
- ✓ Then, we learned about migrations in Django which is mainly used to migrate created models and tables to connected with database.
- ✓ We migrate project using `python manage.py makemigrations` and `python manage.py migrate` commands.
- ✓ For today's session we used SQLite database and to see database we used SQLite viewer software.
- ✓ Afterwards, we created our first app using `python manage.py startapp myapp` command.
- ✓ Then, we run the our project on localhost using `python manage.py runserver`.
- ✓ We import app urls on main urls.py using include function and register the app in settings.py file.

Internship Program – AkashTechnolabs

- ✓ Afterwards, we created our first function in views.py to redirect project to HttpResponse and run project to chrome browser and print Hello World.
- ✓ Then, we got information about admin panel.
- ✓ We created superuser for admin panel using `python manage.py createsuperuser`.

Task: -
